

Documentation

The Australian Research Data Commons Party Infrastructure Project (ARDCPIP) was successfully completed in July 2011. This wiki and the documents it provides remain available for reference purposes but users are advised that it is no longer actively maintained.

Current documentation relating to the Trove People Zone is available in [Trove Help](#). Contributors are advised to review this documentation and contact the Trove Support Team with any queries.

Additionally the Australian National Data Service (ANDS) makes available ARDC Party Infrastructure documentation specifically tailored for the research sector at: <http://ands.org.au/guides/ardc-party-infrastructure-awareness.html>
